

# Cron Jobs Detailed Tutorial

1. To access the Cron Jobs Menu, click on the corresponding icon located on the main screen of your cPanel interface.

The Cron Jobs Menu in the x3 theme appears as follows:

2. There are two different modes you can use to add a cron job: Standard and Advanced (UNIX Style). For this walkthrough we will use Advance (Unix Style) so you will want to click on that to continue to the next steps.
3. There will be 3 total cron jobs to setup. You'll want to enter in your email address to send any output to, then enter in the cron data. Below are screen shots of exactly what you need to enter for each cron job:

## Security/Doba cron job

### Add New Cron Job

Common Settings:	Twice a day (0 0,12 * * *)		▼
