Shell based cron job installer/uninstaller instructions

1. Upload the setupcron.sh file into your carts web root (Ex. /var/www/vhosts/domain.tld/httpdocs/) via scp or ftp.

Additionally you can cd into the directory from command line and then do:
 wget http://www.cartmanual.com/scripts/setupcron.tar.gz
tar –xzvf setupcron.tar.gz

2. Once the file has been uploaded or extracted, you have the following two command options:
sh setupcron.sh install (backs up and inserts 3 crons into /etc/crontab)
and
sh setupcron.sh uninstall (backs up and removes 3 crons from /etc/crontab)

Examples

```
[root@zend2 mike]# vi setupcron.sh
[root@zend2 mike]# sh setupcron.sh install
Backing up crontab
Installation Complete
```

```
[root@zend2 mike]# sh setupcron.sh uninstall
Backing up crontab
Uninstallation complete
```
